DECEMBER, 1938

No. 12

REVIEW OF THE MONTH

Business activity increased in November, continuing the rise which began early last summer. Industrial pro-

Further increase in business activity duction, as measured by the Board's seasonally-adjusted index, reached a level slightly over 100 percent of the 1923-1925 average as compared with 96 in October and an average of 77 in the second quarter of the year. The advance in November reflected chiefly a further substantial increase in steel production and increases also in output of automobiles and textiles. Available figures for department store sales and freight-car loadings and reports on sales of new automobiles indicate a rise in distribution of commodities when allowance is made for usual seasonal changes. There were some decreases in prices of industrial materials during November, while prices of farm products and foods showed little change.

Since last summer the amount of money in circulation has increased somewhat more rapidly than is usual for this season of the year. For several years United States money technically defined as in circulation, that is, the amount outside the Treasury and the Federal Reserve banks, has shown a gradual rising tendency. The amount in circulation during November of this year exceeded \$6,700,000,000, a larger volume than at any previous time except for a short period during the banking holiday in 1933, when there had been large temporary currency withdrawals.

Recent changes in money in circulation The increase in money in circulation during recent months has reflected in large part expanding industrial payrolls, enlarged relief payments, and shipments of United States money abroad in connection with the European crisis. During September and October

total United States money in circulation showed an increase of about \$200,000,000, of which \$60,000,000 was in large-denomination currency, i.e., in bills of fifty dollars and over. Currency shipments to Europe by New York City banks amounted to \$15,000,000 in September and to \$11,000,000 in October, the largest amount reported for any two-month period since collection of the figures began in 1923. Most of these shipments were in large-denomination currency.

The total increase in circulation from the seasonal low point near the end of July to the end of November this year amounted to about \$370,000,000, compared with \$140,000,000 in the same period last year, when business activity was declining, and with about \$350,000,000 in 1935 and 1936, when business was increasing rapidly.

The substantial growth in the amount of money in circulation over the past eight years to a new high level has reflected principally increased holdings of individual savings in the form of currency and a shift from bank deposits to currency as a means of current payments.

Long-term growth in circulation In the decade ending in 1930 the general level of currency in circulation showed little change. In this period there was a growth in the use of bank checks for making payments, and from 1926 to 1929, notwithstanding an expansion in the total amount of money payments, the volume of currency in circulation declined somewhat. In 1930, with decreasing business activity, there was a more pronounced decline. In the period from the end of 1930 until the banking holiday in March 1933 there were substantial withdrawals of bank deposits in the form of currency for hoarding. This was reflected in a marked rise in the demand for large-denomination paper currency, which is more

convenient for hoarding than the smaller notes and coin. The chart shows total circulation of notes of fifty dollars or more and the total of all other paper currency and coin for end-of-month dates from October 1930 to October 1938. The growth shown in the smaller denominations from 1930 to March 1933 was in ten- and twenty-dollar notes, which were probably hoarded, while one- and five-dollar notes and coin, which are used more largely for day-to-day payments, showed little change.

Following the banking holiday there was a substantial return flow of large-denomination currency in 1933 and to some extent in 1934, but the amount outstanding continued substantially larger than in 1930, indicating the retention in hoards of a considerable amount of money.

From 1934 to the end of 1936 there was a renewed increase in money in circulation. This was a period of rising business activity, and much of the increase in circulation was

in coin and the smaller-denomination currency. There was also a fairly steady growth in the amount of larger-denomination currency. In the middle of 1936 a sharp rise in circulation accompanied the payment in cash of the veterans' adjusted service certificates. As a result of a cessation of the rise in business early in 1937 and the recession beginning in the latter part of that year, the amount of money in circulation did not increase in 1937, as it had in the two previous years. In 1938 circulation continued close to the 1937 levels until September, when, as previously indicated, there was a renewed rise.

The higher level of currency in circulation that has been maintained since 1936 at about \$2,000,000,000 above that of 1929 represents increases both in large-denomination currency and in coin and small-denomination bills. The increase in large bills reflects in part the holding of savings in the form of currency rather than in bank deposits, securities, or other property. The banking difficulties in the early thirties may be partly responsible for the increase in the volume of savings held in currency rather than in banks, notwithstanding the safeguarding of bank deposits after 1933 by Federal deposit insurance. Another factor is probably the reduction in interest rates paid on savings and other time deposits.

Increased circulation of coin and small-denomination bills indicates that there has also been a relatively greater use of cash for current payments. This tendency, which may have been due at first to banking difficulties and the absence of banking facilities in some communities, has been furthered by the extension of service charges on checking accounts. Relief payments, made to large numbers of people without bank accounts, may also have increased the demand for currency. Imposition of sales taxes in many States and cities may have had an effect in increasing the demand for coins.

Another factor increasing the amount of currency reported as in circulation is a

growth in vault cash holdings of banks. This increase has amounted to about \$300,000,000 since the end of 1933, most of which has been at member banks. When banks had no excess reserves they ordinarily held no more vault cash than was needed to meet current demands of customers and deposited with the Federal Reserve banks any excess currency that they received. With the growth of excess reserves, however, banks have not been under pressure to return redundant currency, and a few banks have withdrawn a part of their reserves in the form of large-denomination currency.

At a time such as the present, when banks do not need to borrow to get currency, an increase in money in circulation is not an important development. It is only a reflection of a slight shift in the public's needs or preference as between bank deposits and cash. The increase of \$2,000,000,000 in currency since 1929 should be considered in relation to the \$50,000,000,000 which represents the total of bank deposits in the United States.

As the result of gold imports and the release by the Treasury of gold previously held in an inactive account, bank deposits have increased considerably since last spring, and the total of bank deposits and money in circulation is now as large as at any previous time. Gold imports added about \$1,500,000,000 to the country's deposits between the middle of April and the end of November, and Treasury disbursements from its cash holdings and balances with the Federal Reserve banks added \$500,000,000. These additions were offset in small part by an increased demand for currency by the public. The growth of deposits has been accompanied by a decline in their rate of turnover to an extremely low level.

In the first half of the year there was a substantial repayment of bank loans, following an increase in 1936 and 1937, and bank holdings of United States Government obli-

gations also decreased chiefly because of a reduction in the volume available for purchase by banks. Since July, with an increase in offerings of Government securities, banks have increased their holdings.

Volume of deposits at member banks declined somewhat in 1937 and in the first quarter of 1938 but has since shown a substantial increase.

Except for last year, deposits at banks have increased almost continuously since the summer of 1933, as is shown by the chart. Practically all of the increase during

the first nine months of this year, as set forth in the following table, was in demand deposits at city banks. At country banks deposits showed a seasonal decline in the first half of the year and thereafter an increase. Adjusted demand deposits at member banks, which exclude interbank and United States Government deposits and items held by banks in process of collection, and which may, therefore, be called customers' deposits, increased by \$1,200,000,000 in the first nine months of the year and at the end of September amounted to about \$21,600,000,000, close to the largest amount ever reported. It appears from partial reports that adjusted demand deposits of member banks increased further during October and November to above the peak levels reached at the end of 1936. Interbank deposits have also risen to a new high level.

Most of the growth in deposits since the first of the year has been at New York City banks. This is shown in the above table and may be explained in part by the fact that a large portion of the proceeds of gold imports is initially deposited in New York City banks and in part by the increase in interbank balances at these banks. Total loans and investments of New York City banks showed little net change in the period.

At banks in Chicago and other reserve cities, as at New York City banks, in the first nine months of this year there was a substantial growth in deposits, including both

interbank and other deposits, while total loans and investments showed no change. At country banks there was a small decline in deposits and in reserves, as well as in investments, while balances with city correspondents increased.

Growth in deposits since the beginning of the year has not been accompanied by an increase in earning assets of member banks. Total loans and investments declined in the first half of the year and increased thereafter, showing little net change over the year to date. Loans declined by about \$1,000,000,000 in the first nine months of the year, while investment holdings increased by \$900,000,000. From the end of September to the end of November both loans and investments of reporting member banks in leading cities showed little net change.

Nearly all of the decline in loans during the first nine months of the year was at banks in central reserve and reserve cities. Commercial loans at city banks showed a decline of about \$1,000,000,000 from the middle of October 1937 through June 1938, following a growth of about \$2,000,000,000 in the two previous years. Since June these loans have shown little change, although there is usually a seasonal increase in the autumn. Loans to brokers and dealers in securities, which had declined substantially during the last quarter of 1937, accompanying the fall in stock prices, showed a further decline in the first five months of 1938 and a slight increase in subsequent months. They have continued at less than half the maximum of last year.

During the first half of the year retirement of United States Government short-term obligations reduced the supply of direct obligations of the Government available for purchase, and bank holdings consequently declined. Holdings of Government guaranteed obligations increased, however, reflecting purchases of securities of the Home Owners' Loan Corporation and of the Com-

modity Credit Corporation. In the third quarter of the year member bank holdings of direct obligations of the Government increased. The outstanding amount of publicly-offered Treasury bonds rose by \$1,000,000,000 in this period, and member bank holdings of these bonds increased by about \$450,000,000. Increases amounted to \$110,000,000 at New York City banks, \$230,000,000 at banks in Chicago and reserve cities, and \$110,000,000 at country banks. Country bank holdings of Treasury notes also increased by about \$50,000,000 but otherwise there was little change in member bank holdings of Treasury notes or bills. In October and the first three weeks of November, Government securities held by reporting banks declined by about \$110,000,000 in New York City but increased by about \$140,000,000 in 100 other leading cities.

During the first three quarters of the year, city banks increased their holdings of securities other than those of the United States Government by about \$350,000,000, while holdings of country banks showed a decline of about \$100,000,000, all of which occurred in the first half of the year. Holdings of these types of securities increased somewhat at New York City banks in October but declined in November, reflecting principally fiscal operations of the New York State and City Governments.

Correction of October Bulletin

On page 873 of the October issue of the BULLETIN appears a table showing earnings and expenses of member banks including certain operating ratios. The ratios shown against the caption "Net losses on loans per \$100 of loans" are actually based on gross losses (before deduction of recoveries), and the ratios shown against the caption "Net losses on investments per \$100 of investments" are actually based on gross losses and

depreciation. The word "Net", therefore, should not have appeared in either caption.

Revisions in Bulletin Table on Treasury Operations

The Treasury recently has published revisions in the allocation of certain expenditures to the classifications shown in the daily Treasury statements beginning July 1, 1938. In the regular table on Treasury operations on page 1073 of this BULLETIN figures beginning with the fiscal year 1936 have been revised to take account of these changes. Revised figures for the fiscal years 1932-1935, previously published in the September 1938 BULLETIN, are shown in the table below.

The principal revisions include the transfer of certain net expenditures of the Reconstruction Finance Corporation and the Commodity Credit Corporation from "Net expenditures in checking accounts of Government agencies" to "Recovery and relief." In the fiscal year 1938 certain items were transferred also from "Net expenditures in checking accounts of Government agencies—all other" to the checking accounts of the Reconstruction Finance Corporation and the Commodity Credit Corporation.

NATIONAL SUMMARY OF BUSINESS CONDITIONS

[Compiled November 23 and released for publication November 26]

Industrial production continued to increase sharply in October and the first three weeks of November, reflecting principally larger output of steel and automobiles. Wholesale commodity prices showed little change in this period. Volume of employment and national income increased in October.

Production.—In October the Board's seasonally adjusted index of industrial production was at 96 percent of the 1923-1925 average, as compared with 90 percent in September. Steel ingot production increased considerably, averaging 53 percent of capacity in October, and in the first three weeks of November there was a further substantial advance. In the automobile industry output was increased rapidly during October and the first three weeks of November both to stock dealers with new model cars and to meet the increased volume of retail demand accompanying the introduction of new models. Production, which in the first nine months of 1938 had been at a considerably lower level, was at nearly the same rate as in the corresponding period in other recent years. Output of plate glass also increased sharply further in October. Cement production showed a considerable increase, while lumber production declined slightly.

Activity at textile mills, which had risen sharply during the summer, continued at about the August and September rate, although usually there is an increase at this time of the year. Shoe production declined somewhat further in October, and there was a decrease in output of tobacco products, while in most other industries manufacturing nondurable goods changes in output were largely seasonal in character. Mineral production showed a further moderate rise, reflecting in large part increased output of crude petroleum and nonferrous metals. Lake shipments of iron ore also were in larger volume, although a decrease is usual in October. Coal production increased seasonally.

Value of construction contracts awarded in 37 Eastern States increased considerably in October, according to figures of the F. W. Dodge Corporation, reflecting chiefly a sharp rise in awards for public projects. Contracts for hospital, educational, and other public buildings included in the Public Works Administration program were in large volume, and there was a further increase in contracts awarded for slum clearance projects of the United States Housing Authority.

Employment.—Employment and payrolls increased somewhat further between the

Monthly index of physical volume of production, adjusted for seasonal variation, 1923-1925 average = 100.

Monthly indexes of number employed and payrolls at factories, unadjusted for seasonal variation, 1923-1925 average = 100.

middle of September and the middle of October. At automobile factories employment continued to rise sharply and there were further moderate increases in most other durable goods industries. The number employed at canning establishments declined and in other nondurable goods industries showed little change. Employment increased somewhat at mines, on the railroads, and in the construction industry, while in trade the rise was less than seasonal.

Distribution.—Sales at department and variety stores and by mail order houses showed less than the usual seasonal increase in October, partly because consumer buying of winter merchandise was retarded by unseasonably warm weather during most of the month. In the first two weeks of November department store sales increased moderately.

Freight-car loadings rose considerably further in October, owing largely to increased shipments of grains, coal, and miscellaneous freight. In the first half of November loadings showed a seasonal decline.

Commodity prices.—Wholesale commodity prices generally showed little change from the middle of October to the third week of

hand, were reduced, and there were also decreases in zinc, hides, and rubber. Prices of farm products and foods showed small fluctuations in this period.

Bank credit.—Total loans and investments at reporting member banks in 101 leading cities declined by about \$150,000,000 during the first half of November following a substantial increase during October. The decline in November was almost entirely at New York City banks and reflected the retirement of State and local government obli-

Wednesday figures of estimated excess reserves for all member banks and for selected New York City banks, January 3, 1934, to November 23, 1938.

gations held by these banks. Adjusted demand deposits, which reached an all-time peak of \$16,000,000,000 at reporting banks in the last week in October, also decreased somewhat in the first half of November. Member bank reserves in the middle of November were at about the high level reached a month earlier.

Money rates and bond yields.—The prevailing rate on open-market commercial paper declined slightly in November to $\frac{5}{8}$ of 1 percent, a new low level. Other short-term open-market rates were unchanged. Yields on U. S. Government securities and on high-grade corporate bonds showed only small changes during November, continuing close to the low levels reached in October.

Index compiled by United States Bureau of Labor Statistics, 1926 = 100. By weeks, January 6, 1934, to November 19, 1938.

November. Prices of steel scrap and leather advanced. Tin plate prices, on the other

LAW DEPARTMENT

Amendments to Regulation L

Regulation L, relating to interlocking bank directorates under the Clayton Act, was recently amended by the Board of Governors in certain respects, effective November 7, 1938; and the following is a press statement on the subject released by the Board of Governors:

"The Board believes that the principles of Section 8 of the Clayton Act, which relate to interlocking bank directorates, are in the public interest and should be applied to all classes of banks. The law is now discriminatory in that it applies only to cases involving member banks of the Federal Reserve System or private banks. The Board does not believe that there should be discrimination in any respect among classes of banks subject to Federal authority.

"In view of the fact that less than a month will elapse between the convening of the new Congress and February 1, 1939, on which date certain existing relationships would terminate, the Board has exercised its discretion under the law, as to such relationships involving not more than two banks, to extend this time to August 1, 1939. This action was taken for the purpose of calling the matter to the attention of Congress when it convenes, with a recommendation that the existing discrimination between member banks and non-member banking institutions be removed so that the provisions of the law will apply alike to all banks under Federal authority."

The text of the amendments to the regulation is contained in the following resolution which was adopted by the Board:

"RESOLVED, That Regulation L, Interlocking Bank Directorates Under the Clayton Act, be amended, effective immediately, as follows:

"(1) By adding the following after the semicolon at the end of Section 3(a) thereof:

"and any private banker or any director, officer, or employee of a member bank of the Federal Reserve System who is lawfully serving as a director, officer, or employee of a Morris Plan bank or similar institution on January 31, 1939, may continue such service until August 1, 1939;"

"(2) By changing the period at the end of Section 3 to a semicolon and adding at the end of that section a new subsection '(e)' as follows:

"(e) Any director, officer, or employee of any member bank of the Federal Reserve System who, on August 23, 1935, was lawfully serving at the same time as a private banker or as a director, officer, or employee of any other bank, banking association, savings bank, or trust company and whose services in such capacities have been continuous since such date, may continue, until August 1, 1939, to serve such member bank and not more than one other such bank, banking association, savings bank, trust company or private banker."

Guarantee of Account by Special Partner of Member Firm

Section 6(c) of Regulation T provides that a guarantee of a general account may not be given effect for the purposes of the regulation if the guarantor is a "creditor."

It was pointed out at page 90 of the February 1938 FEDERAL RESERVE BULLETIN that the term "creditor" is defined in section 2(b) of the regulation to include, among others, every member of a national securities exchange, and the term "member" is defined in section 3(a)(3) of the Securities Exchange Act of 1934 to include, among others, "any firm transacting a business as broker or dealer of which a member is a partner, and any partner of any such firm." It was stated there, accordingly, that a partner of such a member firm is a creditor within the meaning of the provision regardless of whether or not he holds an exchange membership, and that a guarantee executed by such a partner may not be given effect under section 6(c) of the regulation.

In reply to a recent inquiry, the Board stated that this restriction applies to a guarantee executed by a special partner of such a firm as well as to a guarantee executed by a general partner.

Maximum Loan Value of Bonds Under Regulation U

Section 1 of Regulation U provides in part that for the purposes of that regulation the maximum loan value of stocks shall be as specified in the supplement to the regulation and the maximum loan value of any collateral other than stocks shall be "as determined by the bank in good faith."

This means, in effect, that for such purposes the maximum loan value of collateral other than stocks should be the amount which the bank would customarily lend on such collateral if that were the only collateral for the loan. Consequently, a bank may not determine that such other collateral, as for ex-

ample a bond, has a maximum loan value equal to its current market value unless the bank would customarily lend such amount on the collateral without any additional collateral.

It is believed that the regulation is clear on this point, but since it has developed that there may have been some confusion regarding the matter, it has seemed desirable to publish the foregoing to remove any misunderstanding that may have existed in this connection.

Paying for Purchase in Special Cash Account by Selling Another Security

Section 4(c) of Regulation T provides in part as follows:

"In a special cash account, a creditor may effect for or with any customer *bona fide* cash transactions in securities in which the creditor may—

(1) purchase any security for, or sell any security to, any customer, provided * * * the purchase or sale is in reliance upon an agreement accepted by the creditor in good faith that the customer will promptly make full cash payment for such security;

* * * * *

"Except as otherwise provided in this section 4(c), in case a customer does not make full cash payment for a security purchased by him in the account * * * within seven days after the date on which the security was purchased or sold, the creditor shall promptly cancel, cover, or otherwise liquidate, the transaction or the unsettled portion thereof."

The Board recently had occasion to consider two questions regarding transactions in the special cash account.

The first question arose from a case in which a customer proposed to purchase a security in the special cash account and then to make the necessary prompt payment by selling in the account another security of sufficient value and using the proceeds of sale for the purpose. The question was whether such a proposal for making payment disqualified the purchase for inclusion in the special cash account.

The exact answer to this question would depend upon the circumstances of the par-

ticular case. In some circumstances, such a combination of transactions might be evidence of an attempt to evade or circumvent the regulation, and if the purchase was part of such an attempt its inclusion in the special cash account would, of course, be forbidden, because section 4(a) of the regulation provides in part that:

"A special account established pursuant to this section shall not be used in any way for the purpose of evading or circumventing any of the provisions of this regulation."

It is the view of the Board, however, that, while a proposal to effect such a combination of transactions should be carefully scrutinized, the effecting of the proposed purchase in the special cash account would not necessarily be prohibited if the purchase complied in other respects with the requirements of the regulation and there was in fact no attempt to evade or circumvent the regulation. This would require, among other things, that the proposed purchase be in fact a "*bona fide* cash transaction" as that term is ordinarily used in the trade and that the proposed sale be one that is to be made and settled promptly.

The second question arose from a permissible instance of the type described above in which the security to be sold was deposited with the creditor and sold promptly, well within seven days after the date of the purchase, and the creditor was to receive the proceeds of sale promptly in the usual course of business but not until more than seven days after the date of the purchase. This presented the question whether in such circumstances it might be considered that the security purchased by the customer had been paid for by him within seven days after the purchase.

Assuming that the purchase was one which, as indicated above, could properly be effected in the special cash account, the question whether it might be considered that payment had been made within seven days should be answered in the affirmative. When a customer has sold a security in a special cash

account, section 4(c) permits the broker to make the proceeds of the sale of the security available to the customer upon the receipt of the security in the special cash account even though this be prior to the date on which the broker is to receive the proceeds of the sale. Accordingly, in the instant case the creditor could have paid the customer the proceeds of sale within the seven-day period	and the customer could in turn have used such proceeds to make full cash payment to the creditor for the security purchased. In the circumstances, such payment could properly be treated as having been made by the customer without the necessity for the mechanical passage of funds from the creditor to the customer and back again to the creditor.

REVISED AVERAGES OF PRICES AND YIELDS ON UNITED STATES GOVERNMENT BONDS

The Treasury Department has revised its averages of yields on long-term Treasury bonds as stated in a release dated November 6, which is as follows:

"The Treasury Department released today revised monthly and annual averages of the yields of long-term Treasury bonds from 1926 to date. The revised averages, prepared by the Treasury Department's Division of Research and Statistics, are based upon the daily yields of all outstanding Treasury bonds not due or callable for twelve years or more. The new averages will replace those previously in use which were based upon Treasury bonds not due or callable for eight years or more.

"Prior to 1935, there was very little difference between the yields of Treasury obligations of medium- and longer-term maturities. Since then, however, significant differences have appeared, thereby impairing the usefulness of the earlier averages as representative of the yields of long-term Treasury bonds.

"The most striking aspect of the table of average yields * * * is the substantial decline in long-term interest rates that is reflected even with the exclusion of the medium-term bonds. The average yield in January, 1926, was 3.77 percent. In October, 1938, it was 2.48 percent."

* Revised.

¹ Includes bonds due or callable after eight years from 1919 to 1925 and after twelve years beginning in 1926.

The preceding table shows monthly average yields on long-term Treasury bonds from 1919 to date. The average includes bonds

due or callable in more than eight years from 1919 to 1925 and in more than twelve years beginning in 1926. Averages for the two sets of bonds are identical from January 1, 1926, to July 16, 1928.

In accordance with this revision, monthly averages of Treasury bond prices and weekly averages of yields and prices have also been computed and are shown in the following tables from 1931 to date. The revised series of average prices of United States Government bonds includes all issues due or callable after twelve years. This is the same group of bonds for which the revised average yields are published in the Treasury release of November 6, which is given here.

In using the price averages it should be noted that the comparability of the figures may be affected by changes in the issues included. For example, the price average was the same in September 1938 as in March 1934 although average yields had declined by $\frac{5}{8}$ of 1 percent in the interim. Since 1931, there have been 13 changes in the issues included in the average. The largest change occurred in October 1935, when the 4 $\frac{1}{4}$'s of 1947-52, which were then selling at 114 $\frac{1}{2}$, were removed from the average; this elimination reduced the average by 3.2 points. The aggregate effect of the 13 changes has been to lower the average by 10.7 points. The price series is more useful for comparing market fluctuations over short periods which do not involve differences in the issues included than for comparisons over a long period of time.

* Includes industrial advances.

NOTE.—For description of figures in this table and discussion of their significance, see BULLETIN for July 1935, pp. 419-429. Reprints of article, together with all available back figures, may be obtained upon request from Division of Research and Statistics. Back figures are also shown in Annual Report for 1937 (tables 3 and 4) and for excess reserves in BULLETIN for August 1935, pp. 499-500. Averages of daily figures for recent months and years are shown in the table on p. 1041.

* Reserve requirements reduced by approximately 13½ percent effective April 16.

October.....	14,065	-----	305.0	562.4	-110.2	14.0

² Preliminary.¹ Figures based on rate of \$20.67 a fine ounce in January 1934 and \$35 a fine ounce thereafter.

NOTE.—Figures for domestic production of gold are those published in table, p. 1089, adjusted to exclude production in Philippines. Adjustment based on annual figures reported by Director of Mint and monthly imports of gold to U. S. from Philippines. For back figures, other than those of domestic gold production, see Annual Report for 1937 (table 29).

BANK SUSPENSIONS¹

	Total, all banks	Member banks		Nonmember banks	
		National	State	Insured ²	Not insured
Number of banks suspended:					
1934.....	57	1	-----	8	48
1935.....	34	4	-----	22	8
1936.....	44	1	-----	40	3
1937.....	59	4	2	47	6
1938-Jan.-Oct.....	49	1	1	41	6
Deposits of suspended banks (in thousands of dollars): ³					
1934.....	36,937	40	-----	1,912	34,985
1935.....	10,015	5,313	-----	3,763	939
1936.....	11,306	507	-----	10,207	592
1937.....	19,723	7,379	1,708	10,156	480
1938-Jan.-Oct.....	12,440	36	211	10,897	1,296

¹ Represents licensed banks suspended; does not include nonlicensed banks placed in liquidation or receivership.² Federal deposit insurance became operative January 1, 1934.³ Deposits of member banks and insured nonmember banks suspended are as of dates of suspension, and deposits of noninsured nonmember banks are based on the latest data available at the time the suspensions were reported.

Back figures.—See Annual Report for 1937 (table 76).

MOVEMENT OF GOLD TO AND FROM UNITED STATES¹

October.....	36,130	15,140	18,096	2,895

¹ Comprises centers for which bank debit figures are available beginning with 1919, except that one substitution was made in 1920 and one in 1928.² Cities (other than the 141 centers) for which bank debits are currently reported. The number has changed very little since 1934 and has numbered 133 since 1936.

Back figures.—See Annual Report for 1937 (Table 71), which also gives a definition of bank debits. Figures for individual reporting cities and totals by Federal Reserve districts are available in mimeographed form.

ALL BANKS IN THE UNITED STATES

Comprises all national banks in the continental United States and all State commercial banks, trust companies, mutual and stock savings banks and such private and industrial banks as are included in abstracts issued by State banking departments. Also includes, during the period June 1934-June 1935, private banks which, pursuant to the provisions of sec. 21 (a) of the Banking Act of 1933, submitted condition reports to the Comptroller of the Currency. Under the amended provisions of Sec. 21 (a) private banks no longer report to the Comptroller of the Currency. For comparative figures of private banks included in the figures from June 1934 to December 1935, see Federal Reserve Bulletin for December 1935, p. 883, and July 1936, p. 535. Figures for nonmember banks are for dates indicated or nearest thereto for which figures are available.

¹ Prior to Dec. 30, 1933, member-bank figures include interbank deposits not subject to immediate withdrawal, which aggregated \$103,000,000 on that date. The nonmember bank figures include interbank deposits to the extent that they are not shown separately in a few State bank abstracts.

² Beginning with this date (1) the figures exclude private banks in Georgia which no longer report to the State banking department (43 such banks reported deposits of \$2,491,000 and loans and investments of \$1,087,000 on December 31, 1936); and (2) the figures include Morris Plan and industrial banks in New York and North Carolina, of which there were 45 on June 30, 1937, with deposits of \$50,287,000 and total loans and investments of \$61,165,000. The figures already include such Morris Plan and industrial banks in other States as are covered by State banking department reports.

³ Nonmember bank figures not available.

Back figures.—See Annual Report for 1937 (tables 48-49).

¹ Prior to Dec. 31, 1935, excludes balances with private banks to the extent that they were then reported in "Other assets." Since Oct. 25, 1933, includes time balances with domestic banks which on that date amounted to \$69,000,000 and which prior to that time were reported in "Other assets."

² Does not include cash items in process of collection reported in balances with domestic banks. Prior to Dec. 31, 1935, includes cash items on hand, but not in process of collection, amounting on that date to \$16,000,000.

³ Includes "Due to Federal Reserve banks (transit account)," known as "Due to Federal Reserve banks (deferred credits)" prior to Dec. 31, 1935.

⁴ Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection and, prior to Dec. 31, 1935, less cash items reported on hand but not in process of collection.

⁵ Beginning June 1933 figures relate to licensed banks only.

⁶ Central reserve city banks.

Back figures.—See Annual Report for 1937 (tables 54-58).

REPORTING MEMBER BANKS IN 101 LEADING CITIES

ASSETS AND LIABILITIES OF ALL REPORTING MEMBER BANKS, AND OF REPORTING MEMBER BANKS IN NEW YORK CITY AND OUTSIDE NEW YORK CITY

[Monthly data are averages of weekly figures. In millions of dollars]

Date or month	Total loans and investments	Loans								Investments				Re- serve with Fed- eral Re- serve banks	Cash in vault	Bal- ances with dome- stic banks
		Total	Com- mer- cial, indus- trial, and agri- cultural	Open mar- ket paper	To brokers and dealers in se- curities	Other loans for pur- chasing or carry- ing se- curities	Real estate loans	Loans to banks	Other loans	Total	U. S. Govern- ment obliga- tions		Other securities			
											Direct	Fully guar- anteed

¹ Excluding balances with reporting firms (1) of member firms of New York Stock Exchange and other national securities exchanges and (2) of firms' own partners.² Includes both money borrowed from banks and trust companies in New York City and elsewhere in the United States and also money borrowed from other lenders (not including member firms of national securities exchanges).

NOTE.—For explanation of these figures see "Statistics on Margin Accounts" in BULLETIN for September 1936. The article describes the methods by which the figures are derived and reported, distinguishes the table from a "statement of financial condition," and explains that the last column is not to be taken as representing the actual net capital of the reporting firms.

Back figures.—See BULLETIN for March 1938, p. 196, and (for data in detail) Annual Report for 1937 (table 69).

FEDERAL RESERVE BANK DISCOUNT RATES

[Percent per annum]

Federal Reserve Bank	Rediscounts and advances under secs. 13 and 13a of the Federal Reserve Act ¹			Advances under sec. 10(b) of the Federal Reserve Act		Advances secured by direct obligations of the United States (last paragraph of sec. 13 of the Federal Reserve Act)	
	Rate Nov. 30	In effect beginning—	Previous rate	Rate Nov. 30	In effect beginning—	Rate Nov. 30	In effect beginning—
Boston.....	1½	Sept. 2, 1937	2	2	Sept. 2, 1937	2½	April 29, 1938
New York.....	1	Aug. 27, 1937	1½	2	Oct. 10, 1935	3½	Feb. 8, 1934
Philadelphia.....	1½	Sept. 4, 1937	2	2	Sept. 4, 1937	4	Oct. 20, 1933
Cleveland.....	1½	May 11, 1935	2	2	Oct. 19, 1935	3½	May 11, 1935
Richmond.....	1½	Aug. 27, 1937	2	2	Sept. 10, 1937	4	Feb. 19, 1934

St. Louis.....	1½	Sept. 2, 1937	2	2	Sept. 2, 1937	4	Feb. 23, 1935
Minneapolis.....	1½	Aug. 24, 1937	2	2	Aug. 24, 1937	3	Oct. 8, 1933
Kansas City.....	1½	Sept. 3, 1937	2	2	Sept. 3, 1937	2½	Apr. 16, 1938
Dallas.....	1½	Aug. 31, 1937	2	2	Aug. 31, 1937	2½	Apr. 16, 1938
San Francisco.....	1½	Sept. 3, 1937	2	2	Sept. 17, 1937	4	Oct. 19, 1933

¹ Rates indicated also apply to United States Government securities bought under repurchase agreement.

Back figures.—See Annual Report for 1937 (table 40).

FEDERAL RESERVE BANK
BUYING RATES ON ACCEPTANCES

[Percent per annum]

Maturity	Rate in effect on Nov. 30	In effect beginning—	Previous rate
1-15 days ¹	1½	Oct. 20, 1933	1
16-30 days.....	1½	do.....	1
31-45 days.....	1½	do.....	1
46-60 days.....	1½	do.....	1
61-90 days.....	1½	do.....	1
91-120 days.....	¾	do.....	1
121-180 days.....	1	do.....	1½

¹ This rate also applies to acceptances bought under repurchase agreements, which agreements are always for a period of 15 days or less.

NOTE.—Minimum buying rates at the Federal Reserve Bank of New York on prime bankers' acceptances payable in dollars; higher rates may be charged for other classes of bills. The same minimum rates apply to purchases, if any, made by other Federal Reserve banks.

Back figures.—See Annual Report for 1937 (table 41).

MAXIMUM RATES ON TIME DEPOSITS

Maximum rates that may be paid by member banks as established by the Board of Governors under provisions of Regulation Q.

[Percent per annum]

	Nov. 1, 1933 to Jan. 31, 1935	Feb. 1, 1935 to Dec. 31, 1935	In effect beginning Jan. 1, 1936
Savings deposits.....	3	2½	2½
Postal Savings deposits.....	3	2½	2½
Other time deposits payable in:			
6 months or more.....	3	2½	2½
90 days to 6 months.....	3	2½	2
Less than 90 days.....	3	2½	1

NOTE.—Maximum rates that may be paid by insured nonmember banks as established by the Federal Deposit Insurance Corporation, effective February 1, 1936, are the same as those in effect for member banks. In some States the maximum rates established by the Board and the Federal Deposit Insurance Corporation are superseded by lower maximum rates established by State authority.

FEDERAL RESERVE BANK
RATES ON INDUSTRIAL ADVANCES

Rates in effect, Nov. 30, 1938, on advances and commitments under Sec. 13b, of the Federal Reserve Act as amended June 19, 1934.

[Percent per annum except as otherwise specified]

Federal Reserve Bank	Advances direct to industrial or commercial organizations	Advances to financing institutions—		Commitments to make advances
		On portion for which institution is obligated	On remaining portion	
Boston.....	3½-6	3	3½	½-1
New York.....	4-6	3	4-5	1-2
Philadelphia.....	4-6	2½	(2)	½-2
Cleveland.....	4½-6	3½	4	1
Richmond.....	6	4-6	4-6	1-2
Atlanta.....	5-6	5	5	½
Chicago.....	5-6	1 2½	5-6	1-2

¹ Monthly and weekly data are averages of daily figures, except for municipal bonds, which are based on Wednesday figures.

² Revised series. Average of yields of all outstanding bonds due or callable after 12 years; see pp. 1045-1046 for description.

³ Standard Statistics Co.

⁴ Moody's Investors Service, week ending Friday. Because of limited number of suitable issues, the industrial Aaa group has been reduced from 10 to 3, the industrial Aa group from 10 to 5, and the railroad Aaa group from 10 to 9. Series revised back to Jan. 1, 1937 in July, 1938 because of changes in railroad bond yield averages in all rating groups.

Back figures.—See Annual Report for 1937 (table 80); for U. S. Government bonds, see pp. 1045-1046 of this BULLETIN.

¹ Revised.—Expenditures revised to correspond with those published in a special Treasury statement issued in October 1938 and in the regular daily Treasury statement for November 15, 1938. For revised totals for the fiscal years 1932-1935 see page 1037 of this BULLETIN.

² Excludes debt retirements.

³ Includes taxes under Social Security Act and on carriers and their employees.

⁴ Includes miscellaneous internal revenue, unjust enrichment tax, and processing taxes.

⁵ Excludes expenditures for adjusted service which are included under "Transfers to trust accounts, etc."

⁶ Includes revolving funds of Public Works Administration and Farm Credit Administration.

⁷ Includes expenditures for retirement funds, adjusted service certificate fund, old-age reserve account and railroad retirement account; except for the adjusted service certificate fund, these appear as receipts under "Trust accounts, etc."

⁸ Details given in lower section of table.

⁹ Less than \$500,000.

¹⁰ Excess of credits.

¹¹ Monthly figures for the fiscal year 1938 subject to revision.

¹² Includes other trust accounts, increment resulting from reduction in weight of the gold dollar, expenditures chargeable against increment on gold (other than retirement of national bank notes) and receipts from seigniorage.

¹ Some of the loans made by the regional agricultural credit corporations (prior to October 1935) and by the banks for cooperatives and most of the loans made by the production credit associations are discounted with the Federal intermediate credit banks. The amounts in this column are thus included in the three columns under those headings. Such loans are not always discounted in the same month in which the original credit is extended.

² Preliminary.

³ Average per working day.

¹ For indexes of groups and separate industries see pp. 1077-1078; for description see BULLETIN for February and March 1927.

² 3-month moving average of F. W. Dodge Corporation data centered at second month; for description see p. 353 of BULLETIN for July 1931.

³ The indexes for factory employment and payrolls unadjusted for seasonal variation are compiled by the Bureau of Labor Statistics. For description of the seasonally adjusted index of factory employment compiled by F. R. Board of Governors see pp. 835-837 of BULLETIN for October 1933. For current indexes of groups and separate industries see pp. 1079-1082. Underlying figures are for payroll period ending nearest middle of month.

⁴ For indexes of groups see p. 1084.

⁵ Back figures.—See Annual Report for 1937 (table 81). For department store sales see BULLETIN for October 1933, p. 918; for factory employment and payrolls see BULLETIN for October 1933, pp. 838-866.

¹ Without seasonal adjustment.² Preliminary.^r Revised.³ Seasonal adjustment factors August to December 1938 revised due to earlier shift to production of new models. Tentative adjustment factors: August, 57; September, 56; October, 75; November, 119; December, 118.

NOTE.—For description see BULLETINS for February and March 1927. For latest revisions see BULLETINS for March 1932, pp. 194-196, September 1933, pp. 584-587, November 1936, p. 911, March 1937, p. 255, and October 1938, p. 911. Series on silk-loom activity and on production of book paper, wrapping paper, fine paper, box board, mechanical wood pulp, chemical wood pulp, paper boxes, and lumber, usually published in this table, are in process of revision.

^p Preliminary.¹ See notes for individual countries.² Bank of England only. In addition, according to official announcements, British Exchange Equalization Account held \$934,000,000 of gold on Mar. 31, 1937, \$1,395,000,000 on Sept. 30, 1937, and \$1,489,000,000 on March 31, 1938.³ Figure for March 1937 officially reported as of 20th of month and carried forward through November 1937. Figures for December 1937 through March 1938, officially reported and carried forward for subsequent months.⁴ Figure for August 1, 1936 carried forward through March 1938; April 1938 figure officially reported and carried forward.⁵ Figure for March 7, 1938, date of latest statement received; Austrian National Bank subsequently absorbed by Reichsbank in accordance with German decree of March 17, 1938.

NOTE.—The countries for which figures are not shown separately are, in Europe: Albania, Danzig, Estonia, Finland, Latvia, and Lithuania; in Latin America: Bolivia, Ecuador, El Salvador, and Guatemala; in Asia and Oceania: Australia and Siam; and in Africa: Algeria, Belgian Congo, and Morocco.

For back figures and description of table see BULLETIN for June 1933, pp. 368-372, and July 1936, pp. 544-547; also see footnotes to table in BULLETIN for August 1936, p. 667, and December 1937, p. 1262.

Gold production in U. S. S. R.: No regular Government statistics on gold production in U. S. S. R. are available, but data of percentage changes irregularly given out by officials of the gold mining industry, together with certain direct figures for past years, afford a basis for estimating annual production, in millions of dollars, as follows—*at \$20.67 per fine ounce:* 1929, \$15; 1930, \$31; 1931, \$34; 1932, \$40; 1933, \$56; *at \$35 per fine ounce:* 1933, \$95; 1934, \$135; 1935, \$158; 1936, \$185; 1937, \$180.

^c Corrected.

^p Preliminary.

¹ Includes production in the Philippines.

NOTE.—For monthly figures back to January 1929 and for explanation of table see BULLETINS for June 1938, pp. 539-540, and April 1933, pp. 233-35. For annual figures of world production back to 1873 (including Russia-U. S. S. R.), see Annual Report of Director of Mint for 1936, pp. 108-109 and 1937 p. 104. Figures for Canada beginning January 1938 are subject to official revision.

² Preliminary.

¹ Issue department also holds securities and silver coin as cover for fiduciary issue, which is fixed by law at £260,000,000. However, by direction of British Treasury under Section 2, paragraph (2), of Currency and Bank Notes Act, 1928 (see BULLETIN for August 1928, pp. 567-569), reductions in amount of fiduciary issue (and securities held as cover) have been in effect as follows: Dec. 16, 1936 to Nov. 10, 1937, £60,000,000; Nov. 17, 1937, to Jan. 12, 1938, £40,000,000; since Jan. 19, 1938, £60,000,000. From August 1, 1931, to March 31, 1933, increase of £15,000,000 in fiduciary issue (and securities held as cover) was authorized by British Treasury under Section 8 of Currency and Bank Notes Act.

² By law of October 1, 1936, gold provisionally revalued at rate of 49 milligrams gold 0.900 fine per franc (see BULLETIN for November 1936, pp. 878-880). Of total gold increment of about 17,000,000,000 francs, 10,000,000,000 francs was initially turned over to Stabilization Fund established by law of October 1. By decree of July 22, 1937, gold was again revalued on basis of 43 milligrams of gold 0.900 fine per franc, and resulting increment of about 6,800,000,000 francs was allocated to fund for regulating market for Government securities (see BULLETIN for September 1937, p. 853).

³ Negotiable bills of Caisse Autonome and bills bought under authority of decree of June 17, 1935 (see BULLETIN for Aug. 1935, p. 650).

⁴ Bills and warrants endorsed by National Wheat Board (law of Aug. 15, 1936—see BULLETIN for October 1936, pp. 785-786), and bills rediscounted for account of Banques Populaires (law of Aug. 19, 1936—see BULLETIN for October 1936, p. 788).

⁵ Includes advances granted under authority of Conventions between Bank of France and Treasury of June 13, 1936, June 30, 1937, March 22, 1938, and April 14, 1938 (see BULLETINS for July 1936, p. 536; August 1937, p. 720; June 1938, p. 452, and August 1938, p. 650).

NOTE.—For explanation of table see BULLETIN for February 1931, pp. 81-83, and July 1935, p. 463.

¹ Combined monthly balance sheets not published for December. Prior to merger of two of the banks in February 1932 figures refer to six large Berlin banks. Beginning in 1935 figures are not entirely comparable with those shown for previous years due to changes in reporting practice (See BULLETIN for June 1935, p. 389).

NOTE.—For other back figures and explanation of table see BULLETIN for October 1933, pp. 641-646, and June 1935, pp. 388-390.

1 Prices derived from average yields for 60 corporate bonds as published by Standard Statistics Co.

2 Exchange closed from July 13 to Sept. 2, 1931, and from Sept. 19, 1931, to Apr. 11, 1932. Index for 1931 represents average of months January-June; index for 1932 represents average of months May-December.

3 Indexes of reciprocals of average yields. For old index, 1929-1936, 1929=100; average yield in base year was 4.57 percent. For new index beginning January 1937, January-March 1937=100; average yield in base period was 3.39 percent.

4 New index. See note 3.

SUBSCRIPTION PRICE OF BULLETIN

The FEDERAL RESERVE BULLETIN is the Board's medium of communication with member banks of the Federal Reserve System and is the only official organ or periodical publication of the Board. The BULLETIN will be sent to all member banks without charge. To others the subscription price, which covers the cost of paper and printing, is \$2. Single copies will be sold at 20 cents. Outside of the United States, Canada, Mexico, and the insular possessions, \$2.60; single copies, 25 cents.
